Sub Category

Subject Policy Management

Description of Problem or Suggestion:

It appears from presentation that policy management will be performed by operations, management personnel with use of automation tools. The basis of this decision should be explained. This approach looks like a highly manual process.

Originator's Recommendation

A trade study or analysis should be done to define all requirements and potential methods to satisfy requirements identified. This should be done prior to CDR.

HAIS Schedule 2/28/95

HAIS R. E. Y. Sastry

HAIS Response Date 2/28/95

There are no requirements for Policy and Procedures Management allocated to Release A. However, Office Automation tools are being provided in the Release A timeframe in order to support M&O during the TRMM mission.
